

Cease Coprophagia Soft Chews

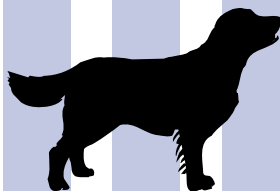

(MSG, B-Complex Vitamins & Cellulase)

- ▶ **Industry-first formulation containing the key ingredients to eliminate and prevent coprophagia, the unhealthy habit of stool (feces) eating by puppies and adult dogs:**
 - **Monosodium Glutamate (MSG):** Will make the dog's feces taste bad discouraging the dog from eating their own stool.
 - **B-Complex Vitamins:** A deficiency of B-vitamins has been associated with coprophagia in pets, so this supplement is formulated to include the entire range of B-complex vitamins.
 - **Cellulase (*aspergillus niger var.*):** Digestive enzyme to assist in the breakdown of cellulose and glucans in the fiber component of the dog's diet.
- ▶ **Soft Chew dosage simplifies daily dosing.**
 - Convenient for the dog owner to administer.
 - Dosing as a daily "treat" strengthens the human-animal bond.
 - Can be used to "hide" other solid dosage forms, saving the dog owner time and money.
- ▶ Formulated with a proprietary, **highly palatable natural chicken liver flavor** to guarantee dogs will readily consume the complete dose.
 - **Improves dosing compliance generating better clinical results.**

Easy to follow dosing schedule:

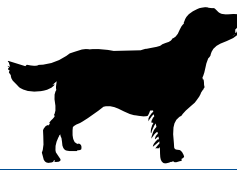

Weight of Dog	Initial Dose (first 15 days)	Maintenance Dose
Up to 20 lbs.	1 Soft Chew TWICE a day	1 Soft Chew ONCE a day
Over 20 lbs.	2 Soft Chews TWICE a day	2 Soft Chews ONCE a day

- ▶ **100% Palatability Acceptance Guarantee.**
 - Pala-Tech guarantees dogs will readily consume this supplement. If your client's dog does not like the taste of this product, simply contact your authorized Pala-Tech Veterinary Distributor for replacement product.
- ▶ Professionally packaged in an **easy-to-open, user-friendly container.**
 - Contains 90 Soft Chews/container.
- ▶ Alternative dosage form...Pala-Tech™ Cease Coprophagia **Granules...** also available for use in dogs and cats.
